Specially designed for your Food industry

SAFAL delivers fully-integrated food ERP software functionality for leading food and beverage processors and distributors. Designed to meet continuously evolving and expanding industry regulatory and compliance requirements, SAFAL provides comprehensive, configurable food ERP software solutions to enable industry best practices and meet industry regulatory requirements for today, tomorrow, and the future. With complete compliance management, bi-directional lot traceability, integrated quality control, and shelf life and expiration date tracking, SAFAL controls all aspects of inventory management.

SAFAL's food processing software capabilities also provide advanced material planning and production scheduling capabilities through the use of formulation and recipe management, ingredient substitution, catch weight processing, and scalable batches. Food processors and distributors can also leverage SAFAL's fully-integrated, RFID and barcode-enabled warehouse management system for streamlined warehouse operations and accurate lot data recording.

Furthermore, SAFAL integrates all business operations throughout the enterprise with a complete set of financial management, purchasing, CRM, business intelligence, and order management capabilities in a comprehensive food processing software solution operating on a single database, eliminating the need for duplicate data entry and improving organization-wide data accuracy and integrity. SAFAL is the chosen food ERP software solution for some of the best-known brands and leading processors and distributors in the food and beverage industry.
